

Bry-Air to participate in FoodPro 2011

Date: Friday, 15 October 2011

Bry-Air, the leading manufacturers of Dehumidifiers is participating in FoodPro 2011

The exhibition will be held at Chennai Trade Centre, Chennai from 21st Oct- 23rd Oct. 2011. Bry-Air will be present at Stall no.93.

Bry-Air, the leaders in Moisture and Humidity Control, announced its participation in FoodPro2011. FoodPro, organized by CII, is the largest food & beverage industry and technology event in Chennai. Come and discuss the solutions for Moisture and Humidity control for your food processing industry with our Airineers.

Compact Dehumidifier

Moisture or rather uncontrolled humidity during processing, packaging, storage, often, plays a party spoiler. Moisture control is essential in every segment of the food industry in the spheres of

- Storage
- Production
- Packing
- Processing
- Low temperature drying.

The total food production in India is likely to double in the next ten years and there is an opportunity for large investments in food and food processing technologies, skills and equipment, especially in areas of Canning, Dairy and Food Processing, Specialty Processing, Packaging, Frozen Food/Refrigeration and Thermo Processing. Fruits & Vegetables, Fisheries, Milk & Milk Products, Meat & Poultry, Packaged/Convenience Foods, Alcoholic Beverages & Soft Drinks and Grains are important sub-sectors of the food processing industry. Health food and health food supplements is another rapidly rising segment of this industry which is gaining vast popularity amongst the health conscious.

Bry-Air will showcase it's Compact dehumidifier (FFB series), which is the smallest answer to all massive moisture problems. The Compact Dehumidifier removes moisture through a process of continuous "physical adsorption". They are effective in terms of space occupied and energy billing.

About Bry-Air

With nearly 50 years of experience in Humidity and Moisture control, Bry-Air offers moisture control solutions for a wide array of applications.
