Validity	0-2 year old machine	2+ year old machine	when machine not performing
Parts included in kit	Limited parts	Most critical parts	Broader selection of critical parts
Pre-assembled parts delivery	No	No	Yes

BryCare® Rotor Replacement Program

The desiccant rotor used in Bry-Air Dehumidifiers is the heart of the system. It is non-toxic, non inflammable and has maximum moisture removal capacity. The rotor slowly rotates, adsorbs the moisture and provides dry air.

Recommended rotor replacement time period

Preventive maintenance
 
 in 5-7 years

Prescriptive maintenance
 
 in 7-10 years

Critical maintenance
 
 in 10+ years

Benefits of Rotor replacement on time

- Fulfillment of the original design conditions for longer time period
- Optimal production capacity and product quality.
- Continuous cost saving by using minimal energy consumption

Risk of operating a low performing Rotor

- Increase in energy consumption
- Decrease in product quality and quantity
- Unable to maintain desired climatic conditions

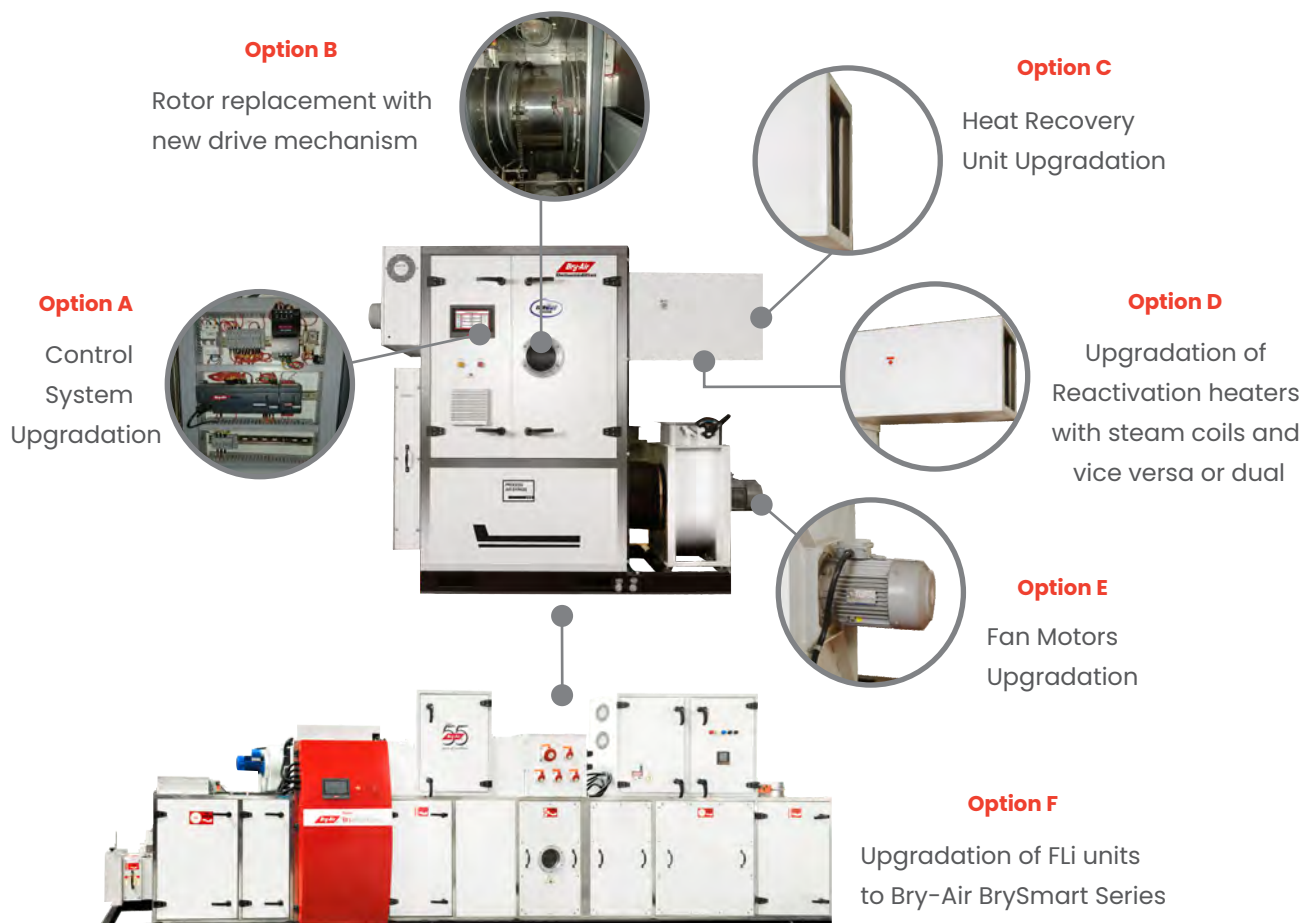

Call **Airineers®**
to check Rotor performance

BryCare® Retrofit program

Retrofit – A new lease of life for your old Bry-Air Dehumidifier (FLi series)

Upgrade the obsolete system into modern system by opting any of the below options:
