

Maximise uptime & performance with

DATA CENTRE SOLUTIONS

Corrosion Prevention

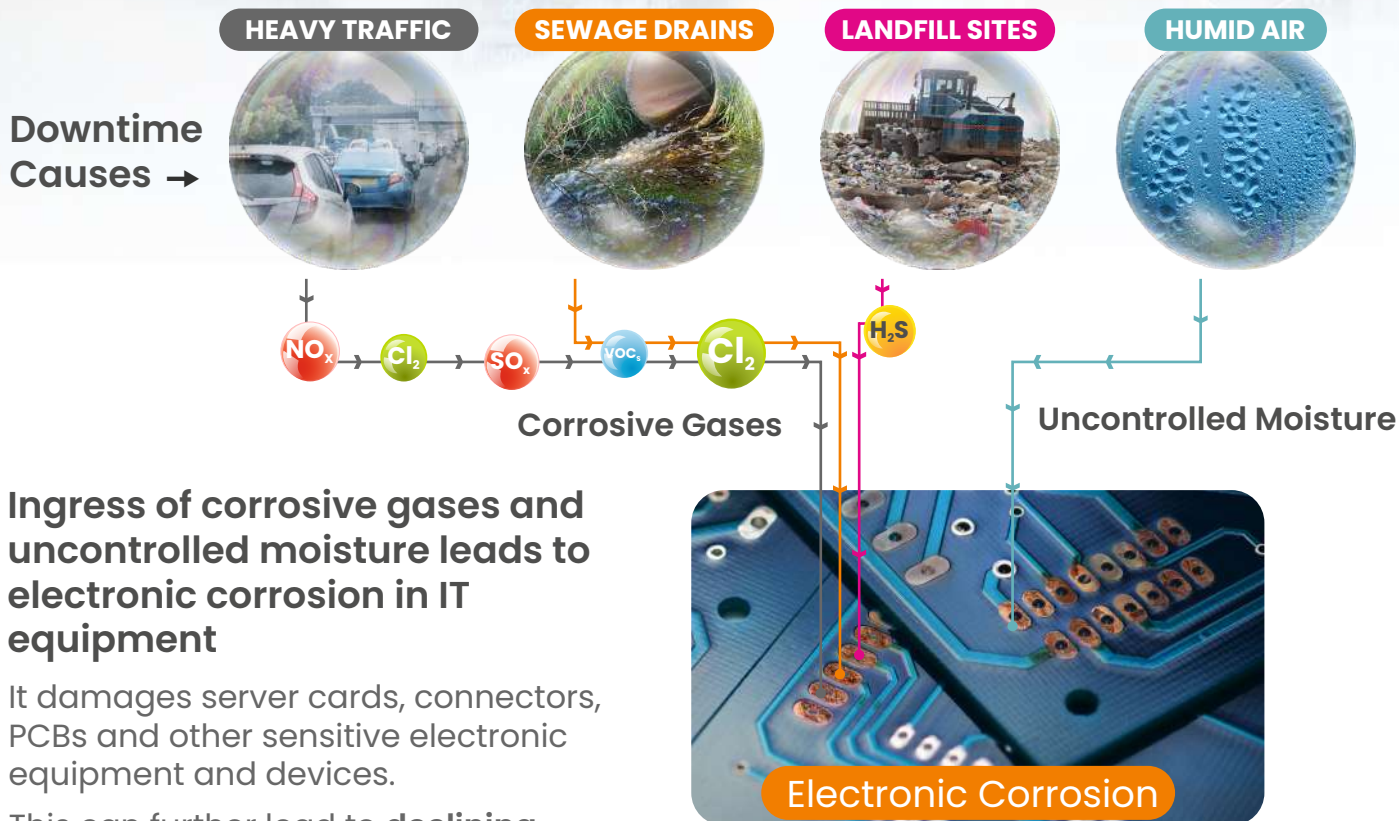

Humidity Control

Maintaining Positive Pressure

Energy Efficient Air Solutions from the Leaders in Dehumidification...Worldwide

PREVENT YOUR DATA CENTRE FROM BREAKDOWN

Benefits of Quality Air Solutions

- 01** Prevent Annual Downtime
- 02** Reduce Cooling Cost
- 03** Corrosion Free Equipment
- 04** Increase Airflow
- 05** Reduce Carbon Footprint

Bry-Air Solution

Bry-Air® DataCenter Air Purifier (DAP)

Custom-designed solution to neutralise corrosive gases and provide perfect environment for the sensitive data centre equipment. It houses UL-certified revolutionary Honeycomb Chemical filter, which can be easily replaced and retrofitted.

- Helps meet ANSI/ISA 71.04-2013 standard in data centres
- Energy efficient, saves energy due to low pressure drop
- FRP constructed body (corrosion resistant)
- Standard capacity range - 500 CFM to 2000 CFM (can be customised on request)

Bry-Air® Compact Dehumidifier

Removes excess moisture from the air. This compact and lightweight unit combines all strengths of a powerful dehumidifier. It also provides comfortable working environment for staff.

- Lightweight with small footprint
- Lowest volume/ weight per CMH
- Includes high performance fluted metal silicate desiccant synthesised rotor
- Place it anywhere – indoor/outdoor including mounting
- Largest capacity range in Compact Dehumidifiers – 170 CMH to 4500 CMH

DRI® Customised Pressurisation Units

- Supplies outdoor air to maintain positive pressure in data hall
- Integrated unit with refrigerant based cooling system on board
- Plug and play machine with all controls inbuilt in the machine
- Optional filtration provided according to ambient air conditions

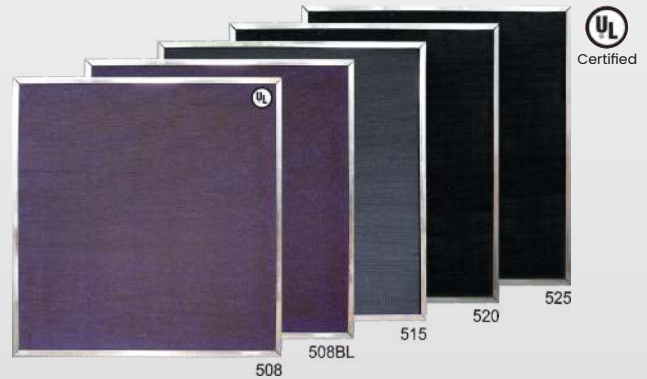

Bry-Air's Commitment to Excellence in Gas Phase Filtration

GPF Test Lab

Bry-Air is the only Gas Phase Filtration Company in India having its own R&D and Testing Lab for chemical filters. The tests are conducted as per ISO/ASHRAE Standard 145.1 and BSR/ASHRAE Standard 145.2/ISO Standard 11155-2 guidelines. The core objectives of the tests are to assess the performance and efficiency of chemical filters in any particular application.

Best-in-Next-Class Honeycomb Chemical Filters (DRISORBTM Series) are used in the Bry-Air DataCentre Air Purifier unit. These new macroporous honeycomb matrix-based chemical filters provide the largest amount of impregnant for chemisorption, capable of neutralising ultra-low concentrations of gaseous contaminants. These chemical filters are easily replaceable and have higher MTBR.

Honeycomb Chemical Filters
