Introducing Chiller – Blending Unit – Mould Temperature Controller from **Bry-Air**®

Bry-Air® Systems, a trusted name in Plastic Auxiliaries with more than 3 decades of experience now adds more teeth to its range . . .

Blending for Simplicity, Accuracy and Consistency

Chiller for increased productivity and quality

Chiller CHA Series :

Bry-Air Water Cooled Chillers for quick cooling of plastic melt that is injected, blown, extruded and stamped so as to reduce cycle time of the product being manufactured. Our new Industrial water chillers starts from a range with cooling capacity of 3.5 Tons to 10.5 Tons. Bry-Air CHA series Water Chiller uses Shell and Tube with finned heat exchanger to provide quick cooling.

Mould Temperature Controller : BTC Series

The Bry-Air Mould Temperature Controller, BTC series, is designed to maintain constant temperature of mould during the moulding process. It is engineered to provide precise temperature control. This technology is increasingly being used to improve the quality of injection moulded parts. It provides consistency and stability in manufacturing process.

Gravimetric Blending Unit :

Bry-Air has the widest selection of Gravimetric Blending units, which can be used as centralised stand-alone system or it can be machine mounted. Throughput ranges from less than 6.8 kg/hr (15lb/hr) to more than 2268 kg/hr. All models dispense and blend all materials (in granular form) for continuous and unflinching accuracy.

Accurate, Automatic and Advanced

Bry-Air®

at 8th Plastivision India 2011

Bry-Air and Delair Team at Plastivision

Be a Winner – Save Energy, Time and Material with Bry-Air Systems

Plastivision is the second biggest show in plastics industry in India and among the top 10 plastic shows in the world with over 72000 visitor entries.

The Bry-Air Stall at Plastivision generated much interest. There was a good turnout at the Bry-Air Stall. The unique design of the stall was much appreciated. On display were our Gen-X technology for drying, conveying, blending, mould dehumidification and heating & cooling. Delair had on display Refrigeration Dryer. Plastic processors who visited the stall were keen on knowing more about the specifics of the Gravimetric Blending Unit, Mould Temperature Controller and Chiller. The crowd puller and show stopper however, undoubtedly was Bry-Air Conveying System.

Right Material to the Right Machine at the Right Time

Our working model of Bry-Air Conveying System was the show stopper at our stand. People were attracted by the live demonstration of the concept and inquired about the machines.

Delair at Plastivision India 2011

Delair showcased delPET dryer. delPET dryers are specially designed for PET bottle manufacturing.

At the Bry-Air Booth

Mr Prem Sagar, Director Bry-Air interacting with customers at the Bry-Air stall.

World Class Plastics Auxiliary Equipment Under One Roof

for Drying, Conveying, Blending, Heating & Cooling, Mould Dehumidification

Drying

BHD Series 30 CMH to 3500 CMH
Engineered above 3500 CMH

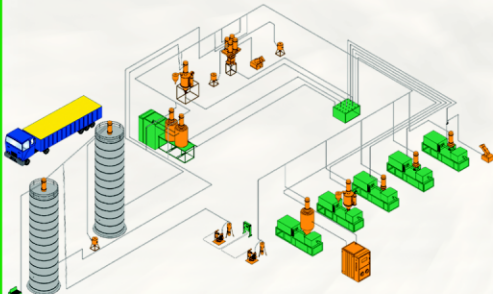

Hot Air Dryer 13 kg to 400 kg
Engineered above 400 kg

Drying Hopper 6 kg to 3600 kg
Engineered above 3600 kg

Conveying

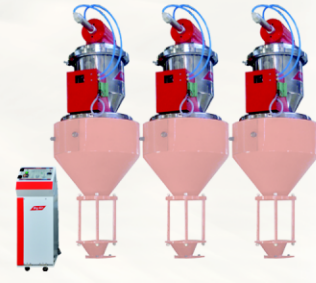

BCS Series Centralized Conveying System
2.2 kw, 4 kw, 7.5 kw with "n" number of station

BVL (F) Series
150 kg/hr to 1000 kg/hr
Engineered above
1000 kg/hr

BVL (T) Series
100 kg/hr to 500 kg/hr
Engineered above
1000 kg/hr

BVL Tetra Series
Auto Loader Tetra
Engineered up to 2000 kg/hr

Blending

BGD Series 160 kg/hr to 2150 kg/hr
Engineered above 2150 kg/hr

BVD Series 0.2 kg/hr to 26 kg/hr
Engineered above 26 kg/hr

Heating & Cooling

CHA Series 3.5 TR,
7.5 TR & 10.5 TR

BTC Series 90°C with Water & 150°C with Oil

Mould Dehumidification

MDS Series 500 CMH to 3000 CMH
Engineered above 3000 CMH

Plastics Save the Environment . . .

An apple a day keep the doctor away.

However in the process the overall health of the **ENVIRONMENT** is endangered.

How ??

Apples are generally packed in crates. A tree is cut every time we use wood for packing apples in crates. Millions of trees are felled in this process. Going by statistics about 800,00,000 trees are felled every year for packaging items such as apples etc., in paper and wood.

A tree is cut every time for packing apples in crates

A healthier option is using plastics . . . it keeps man and environment healthy.

Do not Cut Trees

Plastic is 100 % recyclable.

Do not litter plastic.

Dispose it in bins segregated for the purpose. Keep environment healthy.

Use plastics sensibly and do not litter

Invite of **Bry-Air** for **PlastIndia 2012** booth at Pragati Maidan, February 1-6, 2012

Bry-Air shall participate in the 8th International Plastics Exhibition & Conference - PlastIndia. PlastIndia provides scope for infinite opportunities and is an ideal meeting place for buyers and sellers.

Be there to witness live demonstration of Gen-Y technology in action at **PLASTINDIA 2012** Infinite Opportunities
